

Invasive Species and Overfishing Song

[VERSE 1]:

Invasive Species and Overfishing
All the natives are wishing
Those lionfish had gone missing
And are reminiscing
Of the days before 1992

Where the ocean seemed so blue~
But everyone will tell you~

[VERSE 2]:

The reef was still in trouble then
And the grouper hid in their den
Fish stocks were depleting again...

[CHORUS]:

Oh those fish in St. John
We sure hope you won't be gone
Those lionfish may be treacherous
But we sure know your cleverness
Will outsmart those fishing nets
Oh but I digress...

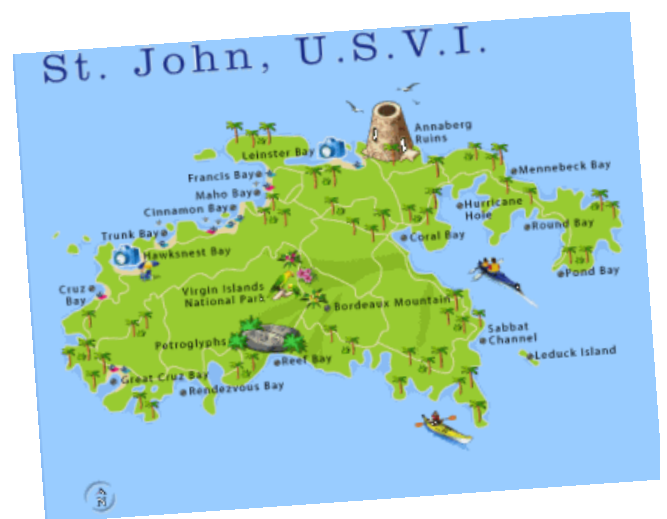

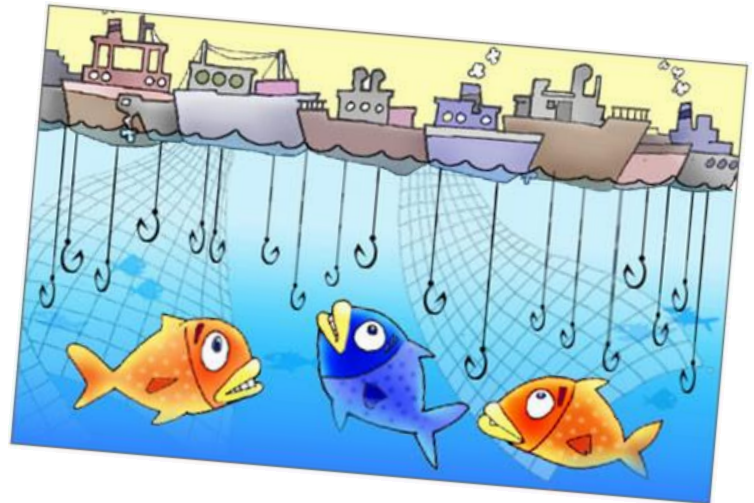

[VERSE 3]:

They can't see it's unsustainable
What would make it explainable?
If only lionfish were exchangeable...

[CHORUS]

[OUTRO]:

One day those lionfish will be gone
And fishing will be more sustainable in St. John
Otherwise the reef might not live on
